

**THERE ARE TWO
WAYS LEAD CAN
GET INTO YOUR
BLOOD**

INHALATION

by breathing in dust and fumes

INGESTION

by eating or passing hand to mouth

**USE THIS GUIDE
TO HELP KEEP
YOUR BLOOD
LEAD LEVEL TO
A MINIMUM**

If you would like further details
on health and safety with regard
to lead please contact
the Lead Sheet Association.

Details of hand wipes and specific
washing preparations are also
available.

Details can be obtained from:

01622 872432

**LEAD
IN BLOOD
LIMITS
ARE COMING
DOWN**

**KEEP CLEAN
KEEP HEALTHY
KEEP WORKING**

Wear gloves when handling lead

Don't eat or drink when working with lead

Don't smoke when working with lead

Apply a barrier cream before starting work

Keep your hands away from your face

Don't bite your fingernails and keep them cut short

LEAD SHEET ASSOCIATION

LEADWORKER'S SAFETY

Scrub hands thoroughly when you finish work and before eating or smoking

If possible, use a proper hand cleaner

Use heavy duty hand wipes if running water is not available

Wear a mask when welding

Wear a mask when stripping old lead

Make sure masks are clean. Check filters or use disposable masks

Use tissues rather than a handkerchief

Beards can prevent masks sealing properly

Remove work wear before leaving site

Handle dusty overalls with care

Wash overalls separately

Ensure your blood lead levels are tested regularly
