

Lead Sheet

Product Information

The Lead Sheet Association

Don't be a victim of crime

Any valuable commodity or property is subject to the attentions of criminals. As metal prices on the domestic and world markets increase, it is prudent to make life as difficult for thieves as possible.

Lead flashing marked with a unique taggant

The Lead Sheet Association has teamed up with the British Security Industry Association to promote the wider use of security and alarm systems, and jointly offer the following advice to help deter lead theft:

- ✓ Perimeter protection is the backbone of all security. Ensure your fences and gates are fully secured, using quality bolts and padlocks.
- ✓ Simple CCTV systems linked to motion detectors can alert you to intruders and allow you to monitor the situation, either yourself, or through a central control room.
- ✓ Property-marking is an essential way in which stolen property can be traced and returned to you. Forensic marking solutions are invisible to the naked eye, but are virtually impossible to remove from clothes, skin and property.
- ✓ A basic, monitored intruder alarm (linked to an external alarm-receiving centre) will make a real impact on deterring a criminal from entering your property, automatically alerting a monitoring centre when an alarm is triggered.
- ✓ Lead lock fittings can provide an effective security system in many situations.
- ✓ Seek expert advice from an impartial security consultant, who will use their wide-ranging knowledge of the security market to choose the right products and services for your premises, at a budget that suits you.
- ✓ BSIA members meet strict quality criteria, and the Association's website – www.bsia.co.uk – is a great place to start when considering your next security investment.

Help catch the thieves

Applying **RedWeb's RedDNA™ i-Grease** provides transference of RedDNA's unique tag, irrefutably links criminals to crime scenes, and provides robust evidence for police prosecution. Call 08700 733932 or e-mail metaltheft@redwebsecurity.com for further details.

Applying a permanent marker like **SmartWater** which dries, will act to identify the item but will not provide evidence to mark the criminal. Call 0800 521669 or e-mail crimesupport@smartwater.com for more information.

Alarm systems should be maintained by NSI- or SSAIB-approved companies. More information can be found at www.nsi.org.uk and www.ssaib.org.

English Heritage's advice note 'Theft of Metal Roof Coverings from Churches and Other Historic Buildings' (2008) is available from English Heritage. E-mail customers@english-heritage.org.uk for your copy.

Finally, seek the advice of your local crime prevention officer to decide what is best suited to your situation.

Want to help stop lead theft?

Then please sign the e-petition on our website!
